## SUMMARY

Computer Science graduate with experience in Data Analytics, Data Science, Python, SQL, Excel, Power BI, and ETL pipelines. Skilled in analyzing 50,000+ records, performing data cleaning, exploratory data analysis (EDA), statistical analysis, and data visualization to generate actionable business insights. Hands-on experience in machine learning data preprocessing, AI-powered data pipelines, KPI dashboard development, and stakeholder reporting for data-driven decision-making.

## TECHNICAL SKILLS

**Languages:** Python, SQL, Java, C

**Data Analysis:** Pandas, NumPy, Matplotlib, Statistical Analysis, EDA, Data Cleaning, ETL Pipelines, KPI Reporting

**Databases & BI:** MySQL, SQLite, Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, Xlookup, Aggregate functions)

**Tools:** Git, GitHub, Postman, Jupyter Notebook, VS Code, Databricks, FastAPI

**ML / AI (Familiar):** Scikit-learn, Hugging Face Transformers, Google Gemini API, Basic PyTorch

**Concepts:** Data Visualization, Business Intelligence, Stakeholder Reporting, Statistical Modelling, NLP Basics

## PROFESSIONAL EXPERIENCE

### Python Developer Intern

Jul 2025 – Aug 2025

*LUMIQ.AI*

*On-site*

- Preprocessed and cleaned 10,000+ document samples using Pandas & NumPy, structuring inputs for a forgery detection pipeline that achieved ~93% accuracy.
- Analysed model output and validation results to identify patterns and edge cases, contributing to a 60% reduction in manual document verification workload.
- Designed and executed 30+ Postman test cases (valid, invalid, and edge-case inputs) for a FastAPI data pipeline, catching data flow inconsistencies before production deployment.
- View Internship Letter

## PROJECTS

### Sales & Customer Data Analysis Dashboard | *Python, MySQL, Pandas, Matplotlib, Power BI, Excel*

- Analyzed and cleaned 50,000+ rows of annual store sales data using Excel and Power BI, transforming raw data into interactive dashboards and actionable business reports.
- Identified key business insights, including highest-performing states, top sales channels, customer demographics, and gender-wise purchasing trends, enabling data-driven decision-making.
- Developed KPI dashboards and visual reports that highlighted sales performance, customer behavior, and revenue trends, providing strategic recommendations to improve store sales and marketing efforts.

### GROBS.AI – AI Resume Intelligence Platform | *Python, FastAPI, Google Gemini, Hugging Face*

- Owned the data layer architecture — designed database schema, built API connectivity, and integrated the backend with a partner for an AI resume platform processing PDF uploads end-to-end.
- Leveraged Google Gemini 1.5 Flash to automate resume scoring (0–100 ATS scale) and job-fit gap analysis, cutting manual resume screening time by ~80% per candidate.
- Built automated resume extraction pipeline using Hugging Face NER and PDFPlumber, parsing skills, experience, and education from uploaded PDFs into structured records.

### Forensic Insight – Document Forgery Detection | *Python, Pandas, Hugging Face, FastAPI*

- Resolved class imbalance and standardised 10,000+ document inputs using Pandas, improving data quality for a forgery detection model achieving ~93% classification accuracy.
- Evaluated model performance across precision, recall, and accuracy metrics to surface edge cases, driving iterative data quality improvements across 3+ review cycles.

## EDUCATION

### SRM Institute of Science and Technology

*B.Tech in Computer Science and Engineering | CGPA: 7.42/10*

Sonipat, India

2022 – 2026
